DESCRIPTORS: *Gallbladder, *Diseases, *Diagnosis,
*Medical examination, Peptic ulcers

In cholecystic disease a slanting blow from below
towards the region of the gall-bladder will elicit pain
more frequently than the methods of Lapin-
Kharitonova, Egorov and others This maneuver of an
angled blow could serve as an aid in the differential
diagnosis between cholecystitis and ulcers of the duo-
denum or antrum. (Author)
